

Open the interface in a browser (Google Chrome is recommended)

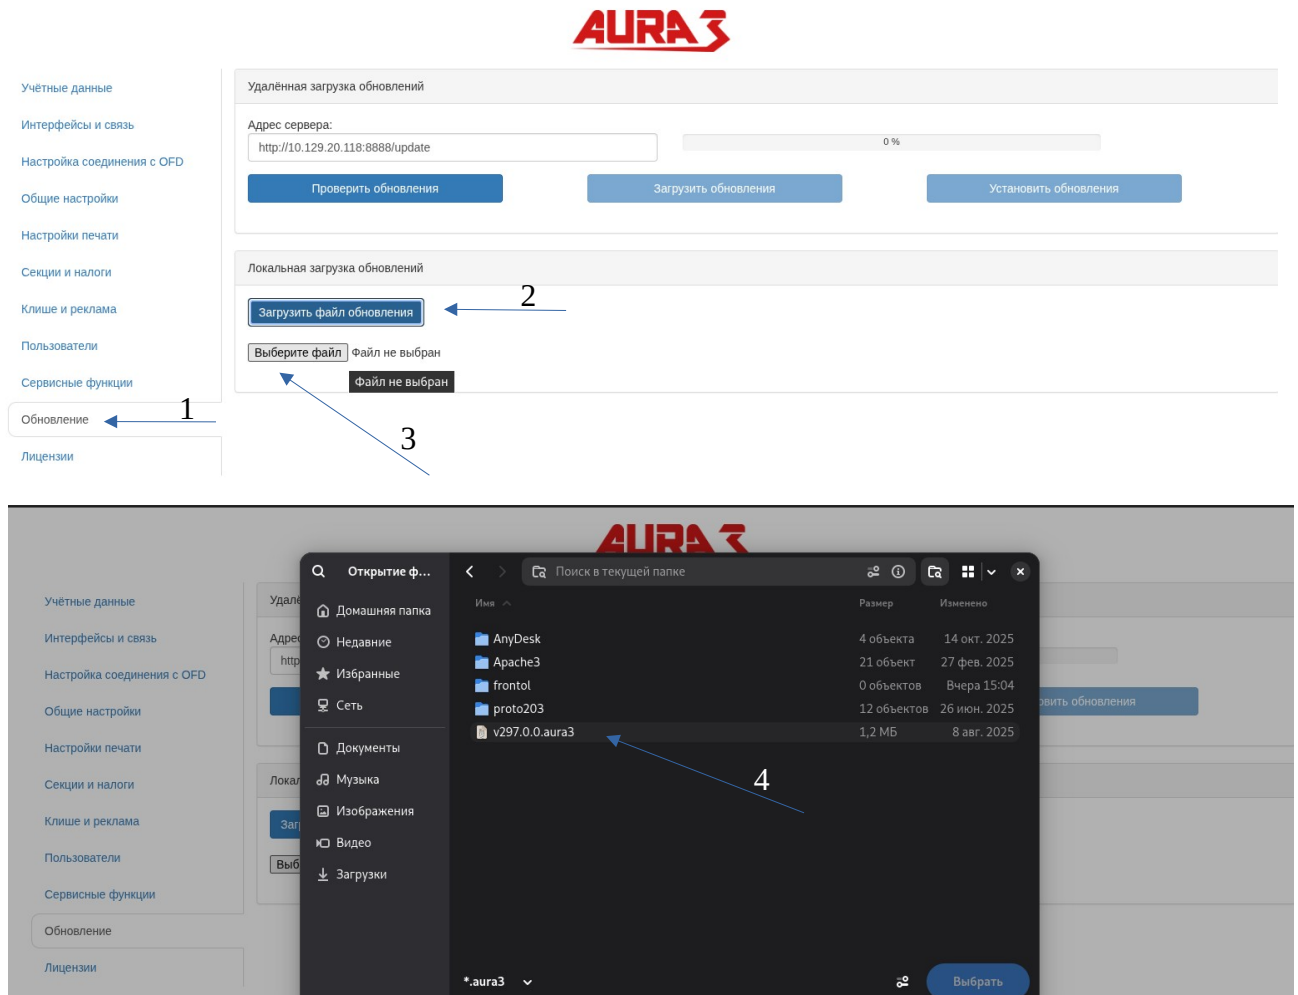

192.168.7.1

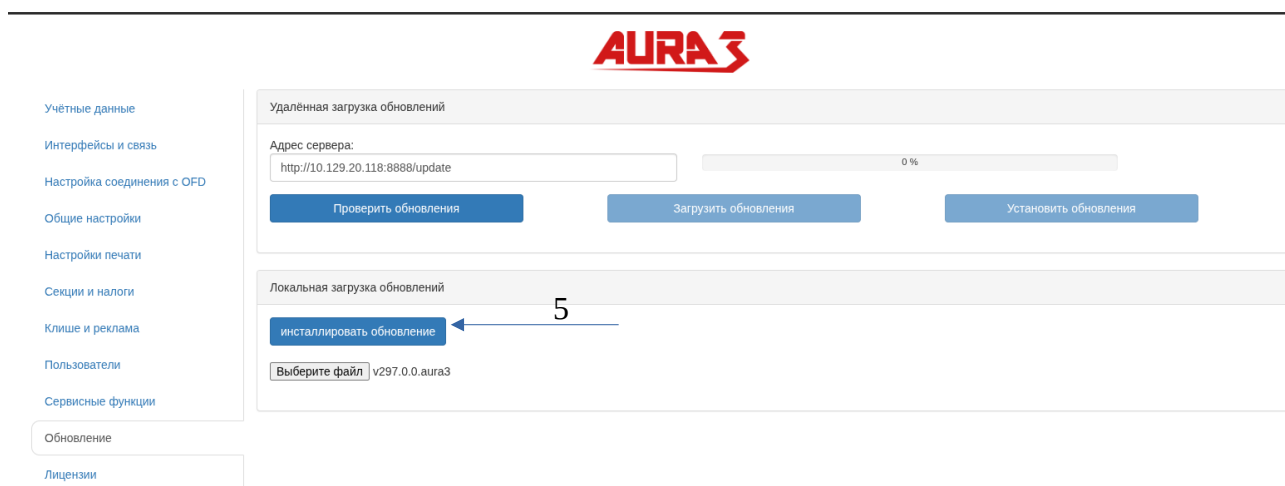

Login = Admin

Password = root

Open the "Обновление" tab (1), click "Загрузить файл обновления" (2), click "Выбрать файл" (3), select v297.0.0.aura3 (4), click "инсталировать обновление" (5)

The CCM will update and reboot.

To check that the update has been installed, go to the tab "Сервисные функции" (6) — «Тестирование ККМ (7)" and click "Провести тестирование (8)"
The software version will be indicated in the window below and on the printed receipt. (9)
